Holistic Cloud Security

Key performance indicators to secure your clouds

- ✓ **Strengthen your security posture**
Continuously monitor and improve the security posture.
- ✓ **Security Operations**
Detect, respond and recover from attacks.
Reduce MTTR and keep an eye on the 360° view.
- ✓ **Asset Inventory**
You can only protect what you know. Continuously discover and secure assets across clouds. Either data, identities and systems.
- ✓ **Governance, Risk and Compliance**
Understand your structured and unstructured data.
Reduce External & Internal Risk, maintain compliance.
- ✓ **Ensure Business Alignment**
Implement seamless security aligned with priorities and processes.
Keep the right balance between User Productivity and Security.

Be fearless, and do more with less
