

# Managed Threat Detection [xdr]

## for Microsoft 365 Defender

An all-in-one service providing security incident management, remote response, threat hunting, custom rules and threat intelligence across all Microsoft 365 Defender modules.

### An Intelligence-led service for an ever-changing environment

Microsoft 365 Defender has turned the XDR (extended detection and response) market on its head. Embedded into the fabric of the Microsoft ecosystem, the capabilities of Microsoft 365 Defender are rapidly enabling organizations to get visibility of the most common threats and to take action. In order to capitalize on this investment it needs to be accompanied by strong processes and skilled security analysts.

Activities such as security incident investigation, threat hunting, threat intelligence, customized detection design and incident containment require a certain amount of experience and automation to face the volume of events generated by Defender across endpoints, Office365, Active Directory and cloud application monitoring.

### Solution

To address these challenges, Orange Cyberdefense offers a Managed Detection and Response service based on the XDR [extended detection and response] stack of Microsoft

365 Defender feeding into our Core Fusion platform, used to enhance, enrich and manage the alerts across our MDR services.

This will allow businesses to capitalize on Microsoft 365 Defender, leveraging Orange Cyberdefense experience and scale drastically by monitoring thousands of clients and identities, and their usage of Office365 and other cloud applications.

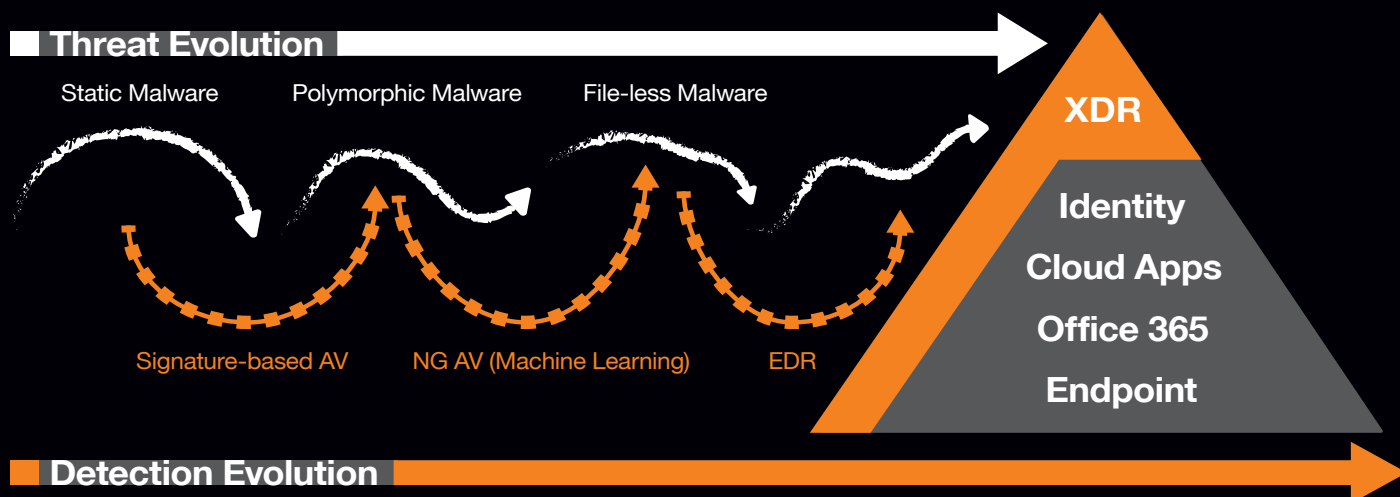

### Service Overview

Managed Threat Detection [xdr] is a subscription-based service that provides businesses using Microsoft 365 Defender with a 24x7 capability to handle incidents, enrich them with threat intelligence and human analysis, and to take response actions where needed.

High value services like threat hunting, threat intelligence and custom detection rules are also included. They provide a coverage of advanced threats like ransomware and APTs while continuously improving the service to keep up with the fast pace of evolving threats.

## Extended Detection and Response (XDR)

Our response to an evolving threat across all 4 Microsoft solutions

## When should you consider it?

- If you require experts to help deploy and run an outcome-based managed detection and response service on all your Microsoft 365 Defender modules
- If you require 24x7 managed threat detection
- If you require a provider that not only provides Managed Detection and Response but also embeds comprehensive Cyber Threat Intelligence, providing more than that which is available “out-of-the-box”

## What do we do?

- **Security incident management:** triage of alerts, analysis and prioritization, notification and reporting
- **Always-on monitoring** across all your active Microsoft 365 Defender modules and analysts ready to take action 24x7 to ensure incidents are contained
- **Continuous improvement** and tuning of the service to keep up with the threat and adapt to your environment
- **Threat Hunting** by combining our global intelligence with existing knowledge of your local environment to seek out advanced threats
- **Integration of Orange Cyberdefense unique Threat Intelligence**, supercharging the Microsoft solution to do more

## What will you get?

- **An experienced team** handling the security incidents generated by your Microsoft 365 Defender tenant, working 24x7, 365 days a year
- **An appointed Service Delivery Manager** to ensure we deliver consistently and to a high standard
- **Security incident metrics and trending post-analysis**, to help you understand what is really happening in your business and what type and velocity of threats we are seeing
- Not just detection but **incident containment** and use of the remediation options available within Microsoft 365 Defender
- **Constantly improved detection capabilities** with custom detection rules, threat hunting and Orange Cyberdefense threat intelligence
- A **trusted partner** with strong service governance and strong SLAs

## What value do we bring with Microsoft?

More than 130 Microsoft certified experts and over 2,700 cybersecurity professionals

Member of Microsoft Intelligence Security Association (MISA) with a Microsoft-verified-MXDR solution badge

More than 8,500 customers worldwide

Accredited Microsoft solution partner security

Representative vendor in the Gartner Market Guides for MDR, Threat Intelligence and Managed Security Services

An entire ecosystem of managed services to anticipate, identify, protect, detect and respond to cyber security threats

## Threat research and intelligence are part of our DNA

Drawing on our 13 global CyberSOCs, years of experience and a vast Threat Intelligence database, Orange Cyberdefense detects and responds to threats 24x7, continuously working with our customers to ensure that we understand and adapt our monitoring to the context of their ever-changing environment.
