

Managed Industrial Security

[identify]

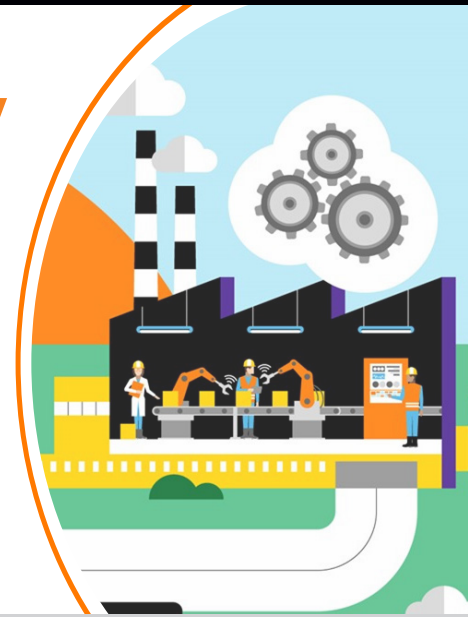

The Digital Transformation is deeply changing business, and cybersecurity is key enabler to succeed in this journey.

You can't protect what you don't know

The digital transformation enables business to uncover tremendous new business potentials and to be proof for the future - but it also means that networks which have not been designed for it are connected with each other. For many security teams this means that they need to build a security program for an environment which is unknown to them.

Securing the digital transformation of your business means to be able to understand your environment, protect your network and assets, detect complex threats, prepare for security incidents, and much more. The choice of a valid security partner to accompany you throughout this journey is business-critical.

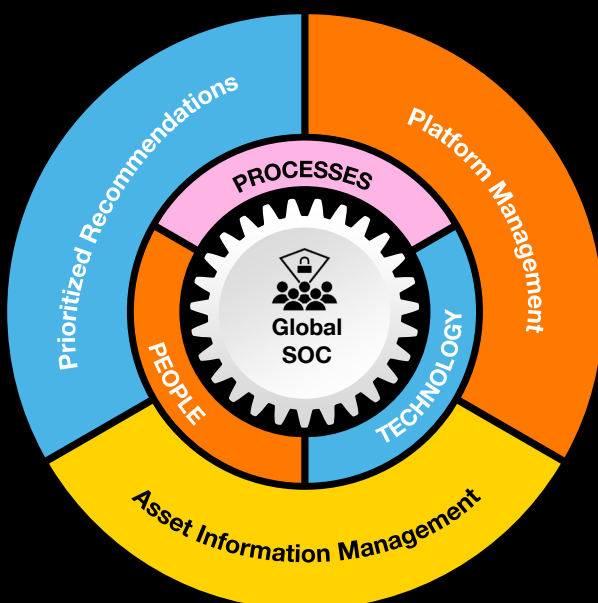

Let's secure the digital transformation of your business together! **With Managed Industrial Security [identify], we help you to gain the visibility you need and to turn this visibility in data-driven OT security.**

Our promise to you:

Let us provide you with OT visibility, so you can focus on taking the right decisions for your business.

Turning visibility in data driven OT security.

Vendor Agnostic Approach

Orange Cyberdefense service platform to support different vendors and deployment types.

Platform Management

24x7 operations of your OT Security Platform.

Asset Information Management

Building and maintaining an asset inventory with contextualized data to support your risk-based decision making.

Prioritized Recommendations

Providing actionable recommendation specific to your OT environment and early warnings on new vulnerabilities.

Key benefits at a glance

Full visibility

Access to the Orange Cyberdefense customer portal for full asset visibility, so you'll know your environment and what you need to protect.

Up-to-date information

Reliable information basis to build a security program on and constantly up-to-date data on your OT assets, connections and vulnerabilities.

Increased maturity

Prioritized recommendations to increase your OT security maturity and early warnings on new vulnerabilities.

OT Experts on hand

Specialized OT service delivery teams always at your disposal and a significant reduction of error due to manual process.

How does it work?

- We deploy and manage the **OT Security Platform** from a supported vendor.
- We help you build and maintain a continuously updated **inventory of assets** in your OT environment.
- We contextualize asset information and **map out all connections and vulnerabilities**.
- We provide actionable **recommendations** specific to your environment.
- We assist you in leveraging **Threat Intelligence** and **Vulnerability Intelligence** to provide better insights.
- We provide you with a **reliable information basis** to build a security program on.

Why should you consider it?

If you require:

- A complete **management of your OT Security Platform** to gain **full visibility** on your environment.
- A **vendor agnostic approach** for OT visibility across your OT environment.
- Experts to operate your **OT Security Platform** to receive **early warnings** on new vulnerabilities.
- Contextualized **visibility into your OT environment** to run an OT security program.
- Expert **advices and recommendations** to increase our security maturity and **reduction of manual errors**.
- A **strategic partner** with long term IT and OT security expertise and a holistic portfolio.
